Summary

Data Engineer with a background spanning software engineering, business analytics, and cloud-native data systems. Focused on building trusted data products through validation, monitoring, observability, and metadata design so teams can turn complex operational data into reliable datasets.

Experience

Business Analytics & E-Commerce Lead

Sept 2022 – Aug 2024

Tienhuang Menswear — Taiwan-based menswear brand operating a vertically integrated e-commerce business

- Built Python, pandas, Excel, and Meta Ads analytics workflows to reconcile revenue, validate advertising performance, and support inventory and marketing decisions across thousands of transactions.

Software Engineer

June 2021 – Aug 2022

Shopee Co. Ltd. — Leading Southeast Asian e-commerce platform

- Reduced QA workload by 80% by engineering SQL validation and anomaly-detection pipelines on 800+ QA scenarios.
- Accelerated reporting speed by 78% with regression monitoring pipelines that surfaced data inconsistencies earlier.
- Reduced query latency by 15% by optimizing distributed ETL workflows and GCP data-access patterns.

Data & Operations Intern

Jul 2020 – Jun 2021

Compal Electronics — Global Fortune 500 electronics manufacturer and ODM partner

- Maintained production testing infrastructure supporting laptop manufacturing operations and hardware validation workflows.
- Analyzed workforce and operational data across 5+ departments to support staffing decisions, resource planning, and cross-functional reporting.

Projects

NailAI — Cloud-Native Metadata Pipeline

[demo]

- Routed asynchronous image-processing jobs through Cloud Run, Pub/Sub, and Cloud Storage workflows.
- Modeled BigQuery metadata pipelines for request, job, and prediction tracking, monitoring, diagnostics, and analytics.
- Optimized BigQuery partitioning and clustering for warehouse-centric analysis and lower query latency.

FitMatch — Product Data Modeling Platform

- Normalized PostgreSQL schemas, Prisma routes, catalog ingestion, and QA surfaces in a FastAPI/Next.js data product.
- Validated 1,205 products, 65 size profiles, 407 profile chart rows, and 1,205 product-profile relationships.
- Achieved 24/24 passing validation cases with feedback collection and regression-style boundary tests.

Stock Intelligence Copilot — Traceable Data Product

[demo]

- Unified market data, fundamentals, news, earnings, and portfolio signals into evidence bundles with per-tool error capture.
- Expanded tests across runtime execution, tool contracts, route adapters, portfolio scenarios, and SSE behavior.

Technical Skills

Languages: Python, SQL, Go, R

Data Engineering: ETL/ELT, schema validation, relational modeling, metadata pipelines, batch/stream ingestion, data quality, Excel

Cloud & Warehouses: GCP, BigQuery, PostgreSQL, Prisma, MongoDB, partitioning, clustering, Cloud Run, Pub/Sub

Monitoring: anomaly detection, regression monitoring, validation workflows, observability, logging, automated testing

Systems: FastAPI, REST APIs, Docker, asynchronous processing, event-driven workflows, query optimization

Education

University of Colorado Boulder — MS, Data Science | GPA: 3.76/4.0

May 2026

Soochow University — BS, Data Science | GPA: 3.7/4.0

June 2021
